GEEP (Global Electric Electronic Processing) – Responsible Electronics Recycling in Action

Forgotten TV Treasure to be Recycled is Returned to its Rightful Owner

PRESS RELEASE

February 15, 2017 – GEEP (Global Electric Electronic Processing) is pleased to announce that Barrie Police Investigative Services have returned a forgotten treasure left inside an old TV, recycled at GEEP's Barrie facility, to its rightful owner.

As reported by Barrie Today, Barrie Police Investigative Services have spent the past month trying to trace back and return the found treasure to its owner.

On January 13th of this year, an old television was dismantled at our GEEP Barrie facility, located at 220 John Street, when an employee found a cash box inside the TV with over \$100,000 cash and some personal banking records, dating back over 30 years ago, to 1985.

The GEEP employee reported and handed over the items to the General Manager and police were involved to handle the matter accordingly. The personal documents left enclosed in the cash box helped Police trace back the banking documents and paperwork to a 68-year-old male, reported from Bolsover, Ontario.

The banking paperwork and cash box had apparently been placed in the television years ago, for safe keeping and forgotten about. Reportedly, the television was then passed onto a family friend who was unaware of its contents and decided it was time to recycle it.

While other reports have noted the TV had been waiting in the recycling yard for over a year, GEEP can confirm that all materials to be recycled are typically dismantled and recycled within a 2 to 30-day window of arriving at our facility.

GEEP commends the honest actions of our employees and staff and are happy to hear the money has been returned to its original owner.

GEEP is dedicated to providing best in class customer service and electronics recycling solutions designed to; protect customer's information, preserve customer brand image, and enhance customer capital management.

ABOUT US

GEEP (Global Electric Electronic Processing) is a global leader in electronic asset management and end-of-life electronics recycling.

GEEP is committed to enabling the safe and secure reuse of electronics, recovery of natural resources from obsolete electronics, and safe and responsible recycling of electronics to divert waste from landfill. GEEP employs over 500 employees across its 10 divisions located in Canada, the United States, and Costa Rica.
